

ALUCOBOND®

About 3A Composites GmbH

3A Composites GmbH has developed, manufactured and marketed high-quality aluminum composite panels, structural composite material, plastic sheets and lightweight foam boards for architecture, visual communication and transport & industry markets since 1969. The company's famous brands ALUCOBOND®, DIBOND®, ALUCORE®, KAPA® and FOREX®, have established its reputation as a global company.

Following the integration of the Polycasa group in April 2015, 3A Composites GmbH has extended its product portfolio with a wide choice of plastic sheet to strengthen its position as a diverse and leading manufacturer of materials for display, building and industrial applications in Europe.

3A Composites GmbH is part of the international 3A Composites Group. The group belongs to the listed company Schweiter Technologies headquartered in Horgen, Switzerland. 3A Composites, formerly known as Alcan Composites, is an independent division of Schweiter Technologies since December 1st, 2009 and has more than 4'000 employees worldwide. In addition to the above mentioned market segments, 3A Composites focuses on wind energy and the marine market with their trademarks AIREX® and BALTEK®.

About ALUCOBOND®

ALUCOBOND® is the world market leader for aluminium composite panels. Since their introduction on the market in 1969, these panels have been used above all in architecture and for corporate identity programmes, particularly for façades, wall and roof cladding. The panels are on the one hand outstanding due to their extreme evenness and rigidity, on the other hand they offer excellent formability with simple fabrication techniques. They are available in a large variety of colours, surfaces and formats as well as in various core variations such as a fire-retardant and a non-combustible version. With their comprehensive know-how, 3A Composites supports architects, designers and investors in designing and realizing building envelopes. The brand ALUCOBOND® is produced at the 3A Composites factories in Singen, Germany, Benton in USA, Shanghai in the People's Republic of China and in Pune, India.

ALUCOBOND® PLUS

ALUCOBOND® PLUS has been developed exclusively for the more stringent requirements of the fire prevention regulations in architectural products. Thanks to its mineral-filled, core ALUCOBOND® PLUS meets the stricter requirements of the fire classifications. It is hardly flammable and offers all the proven product properties of the ALUCOBOND® family, such as flatness, formability, resistance to weather and easy processing.

ALUCOBOND® A2

ALUCOBOND® A2 is our non-combustible aluminium composite panel used in architecture that fulfills the respective standards worldwide. Thanks to its mineral-filled core, ALUCOBOND® A2 meets the strict requirements of the fire regulations and enhances the possibilities for the concept and design of buildings. ALUCOBOND® A2, just like all the products of the ALUCOBOND® family, allows simple processing, is impact-resistant, break-proof and weatherproof and, above all, non-combustible.
